

REGENERATIVE MEDICINE CLINIC OF THE YEAR

Advanced Regeneration

TEXAS

Advanced Regeneration is a wellness centre offering procedures and treatments that help men and women feel more confident about how they look and how their bodies function on a day-to-day basis. The regenerative specialists provide a vast spectrum of services, from non-invasive fat reduction procedures and pain reducing laser therapies, to skin smoothing solutions and treatments for sexual health issues. Based in the Dallas/Fort Worth area, Advanced Regeneration is the only clinic offering the standard and range of services they do and have helped thousands of clients subdue and eradicate pain relief in all areas of the body including back pain, ankle and foot pain, head pain, nerve pain and acute pain.

The judges were particularly impressed by the facilities available at Advanced Regeneration, who have access to some of the most advanced pain relief and regenerative equipment. As well as certification to use Cryoskin, ThermiVa and acoustic sound wave therapy, the clinic also leads the field in terms of their laser treatments including high powered lasers, double laser treatments for patients with multiple injuries and cold laser therapy for pain reduction and tissue regeneration. Enhancing more than just bodies, Advanced Regeneration takes pride in their personalised approach and result-orientated treatment protocols which also enhance lives.
